## INTRODUCTION

## OUR MISSION

We want to make a positive impact on the world of business.

# Solution – Steps

Solution Steps is a comprehensive business solutions provider that helps businesses of all sizes to thrive and succeed. Our team of experts is dedicated to providing personalized solutions to meet the unique needs of each of our clients. From strategy development to implementation, we are committed to delivering results that exceed your expectations. Trust us to take your business to the next level.

A background image showing a group of people in a meeting, with a large red semi-transparent overlay covering the bottom half of the page. The overlay contains a list of three steps: 1. Research, 2. Experiment, and 3. Optimize. The word 'Meeting' is visible on a whiteboard in the background.

# About Us

Welcome to Enercor Industries!

At our company, we are proud to be a trusted supplier of Cutting tools from stock. We understand the importance of having the right tools for the job, which is why we offer an extensive inventory of high-quality products. From cutting tools to accessories, we have everything you need to take on any project.

Our team of experts is always ready to assist you in finding the right tool for your specific needs. We offer fast and reliable shipping, ensuring that your order arrives on time and in perfect condition. Additionally, we stand behind the quality of our products and offer a satisfaction guarantee.

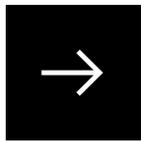

As a leading supplier of CNC tools, we are committed to providing excellent customer service. We believe in building long-term relationships with our clients, and we work hard to earn your trust and loyalty. Contact us today to learn more about our products and services, and to place your order.

Our product line is listed below.

- Band Saw Machines
- Band Saw Blades
- Kennametal Products
- Deburring Machines & Tools
- Tube Tools
- Bolting Tools
- Stationary & Rotating Tools
- HSS Tools
- Carbide drills
- Circular Cutter
- Crane Spares
- Electrical & Instrumentation items
- PPE

# **MEBA**

*sawing solutions.*

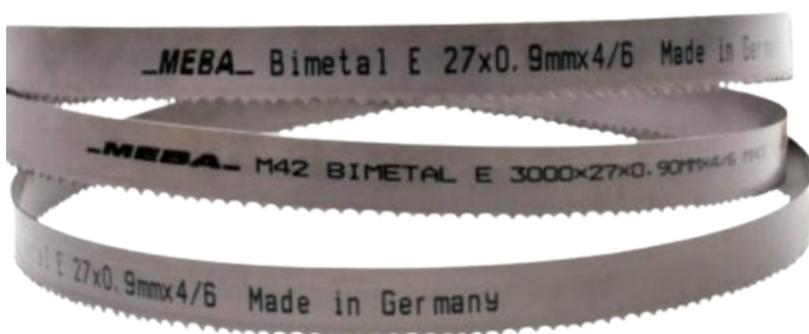

## MEBA GmbH, Germany

MEBA are pioneers in band saw technology. Since 1958 the company has invested heavily in technology resulting in considerable developments in the field of bandsawing. MEBA have a wide range of metal band sawing machines to choose from. Ranging from small manual and semi automatic machines, up to double mitre fully automatic CNC Machines.

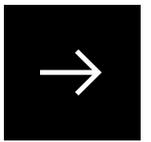

We Supply,

- MEBA - BiMetal
- MEBA - PB
- MEBA - H1 & H2
- MEBA - CARBIDE
- MEBA - DIAMOND

# SOLUTIONS FROM FONG-HO

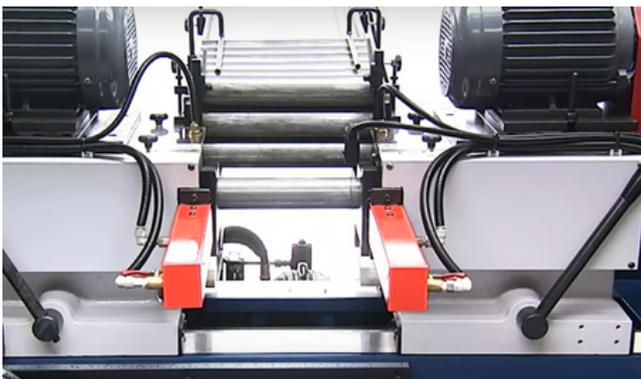

## HIGH PERFORMANCE CIRCULAR SAW & TUBE PROCESSING SOLUTIONS FROM FONG-HO

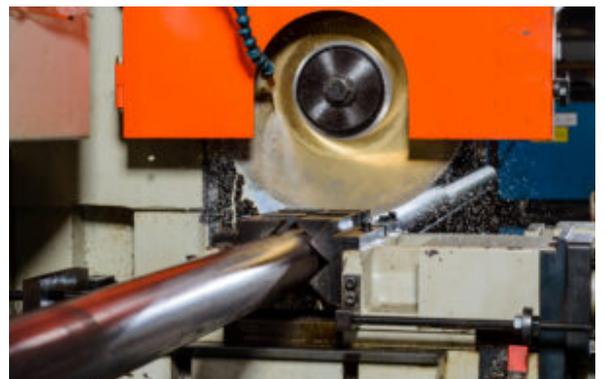

FONGHO has been the leader in the production of high- speed steel and tungsten carbide metal cutting circular saw machine, tube chamfering machine, saw blade grinding machine, CNC pipe cutting machine & tube processing from Taiwan for industries since 1979.

### PRODUCT RANGE:

- Fully-automatic circular saw machine for ferrous and non-ferrous solid bars, tubes & profiles.
- Semi-automatic circular saw machine for ferrous and non-ferrous tubes & profiles
- Semi-automatic & automatic chamfering solutions for metal tubes
- Automatic modular line having cutting, chamfering and double head turning solutions in same machine
- Fully-automatic laser cutting machine which can eliminate sawing, drilling, milling and deburring process for tube processing

**PIPE CHAMFERING**

**TUBE CUTTING**

# TOOLINGS SYSTEM

- TURNING

- THREADING

- TOOL HOLDERS & ADAPTERS

- SPARE PARTS

# HSS & CARBIDE DRILLS

Looking for reliable HSS and carbide drills for your projects?

Look no further! Our website offers a wide selection of high-quality tools built to last.

For our HSS drills, we offer sizes ranging from 0.2mm to 20mm in diameter, with lengths varying from standard to extra long. Our carbide drills range in size from 0.1mm to 25mm in diameter, with lengths available in both standard and extra long options.

We also offer a variety of shank sizes for our drills, including 1/4", 3/8", and 1/2" diameters, as well as smaller sizes for micro drills.

No matter what size drill you need, we have a wide selection of high-quality HSS and carbide drills to choose from. Browse our collection today to find the right size for your project.

# TUNGSTEN CARBIDE ROTARY BURRS

Looking for high-quality tungsten carbide rotary burrs?

Look no further! We offers a wide selection of durable and efficient tools for all your cutting, shaping, and grinding needs.

Made from high-grade tungsten carbide material, our rotary burrs are built to last and can handle even the toughest materials. We offer a range of shapes, sizes, and coatings to meet your specific needs.

From deburring and finishing to shaping and carving, our tungsten carbide rotary burrs deliver exceptional performance and precision.

Browse our collection today and experience the difference of our high-quality tools.

We offer burrs in a range of shapes, including cylindrical, ball, oval, tree, flame, and more, with diameters ranging from 1mm to 25mm. We also have burrs with various lengths and shank sizes, from 3mm to 12mm.

In addition, we offer burrs with different coatings, including uncoated, TiN-coated, and diamond-coated, to suit different applications and materials.

No matter what size or shape of tungsten carbide rotary burr you need, we have a wide selection of high-quality tools to choose from. Browse our collection today to find the right burr for your project.

# HIGH PERFORMANCE TCT CIRCULAR SAW

## CERMET:

Cermet circular saw blade, throw-away type, suitable for cutting solids with medium-low hardness and low content of carbon

## PREMIUM:

Carbide tipped circular saw blade, throw-away type with PVD coating. Suitable for cutting solids with medium-high hardness and high carbon content or for stainless steel & tubes with different wall thickness.

## CERMET-AL:

Cermet circular saw blade, throw-away type, suitable for cutting solids & profiles of aluminium applications.

# HIGH PERFORMANCE HSS CIRCULAR SAW

## HSS - TIN

With a surface coating with 3 microns thickness layer, with a Titanium base, yellow colored. Suitable for cutting medium hardness materials up to 500 N/mm<sup>2</sup>.

## HSS- TICN

With a surface coating with 2,5 microns thickness layer, with a Titanium and Carbon base, which gives a high hardness and a low friction. Suitable for cutting medium hardness materials up to 800 N/mm<sup>2</sup>.

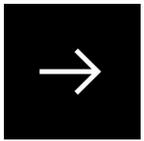

## HSS- TIAlN

With a surface coating with 3 microns thickness layer, with a Titanium and Aluminium base, combining high toughness of the multi layer structure with high hardness. It allows machining at high speed, with few lubricant. Suitable for cutting materials with a hardness up to 1100N/mm<sup>2</sup>, Cast Iron, Stainless Steel, etc.

# HIGH PERFORMANCE HOLESAWS

## BI-METAL:

The Bi-Metal hole saw features a new tooth design, providing a smoother and faster cut, ideal for professionals. "Mini" hole saw has a hole saw depth of 22 mm. "Techno cut" hole saw is ideal for industrial purposes and has an increased hole saw depth of 38 mm. Both Mini & Techno cut hole saw feature a new tooth M42 material for enhanced heat and wear resistance. Complete range of Mini & Techno cut hole saw available from 12mm to 104mm

## TCT:

The carbide tipped hole saw for stainless steel sheet metal is designed for cutting stainless steel and high alloy steels, non-ferrous light metals and reinforced fabrics. Complete range of TCT hole saw available from 15 mm to 51 mm

## DIAMOND:

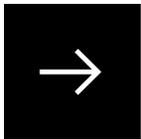

The high performing Diamond Grit hole saws are capable of cutting through porcelain, glass, ceramic, brick, concrete and stone. The Diamond Tile Drills are ideal for drilling small diameter holes in many non-metallics. Complete range of Diamond hole saw available from 5 mm to 35 mm

## ARBORS & ACCESSORIES:

A full line of accessories including Quick-Hitch™ arbors and pilot drills enables you to optimize each job with safe, cost efficient solutions.
